

## “Forsage” International Forum of Energy & Industry Young Community

### CONCEPT of “Forsage 2017” International Forum of Energy & Industry Young Community

“Forsage” International Forum of Energy & Industry Young Community is a unique federal-level platform intended for communications and knowledge exchange between young experts of energy and industry as well as for the development of young experts potential and elaboration of draft approaches to current hi-tech tasks both general and of certain companies.

“Forsage” is held by Rosatom and MAKO Association of individuals and organizations for corporate training and development with support of the Ministry of Education and Science of Russia, Ministry of Energy of Russia, Ministry of Industry and Trade of Russia, and Administration of Kaluga Oblast. The Forum is arranged as a tent camp. It has been held since 2011, being attended by about 800 delegates and almost 150 outside experts and guests every year.

For 6 years “Forsage” has been bringing together young representatives of the nuclear industry, fuel, engineering, ferrous and nonferrous, petrochemical sectors, IT and telecommunications, being an assembling point for all partners and participants of the Forum, where they analyze the historical legacy, discuss current tasks and design future thus providing a system view on any chosen subject.

Lead experts, scientists and top managers from Russian and foreign companies share their experience and knowledge with the Forum attendees which facilitates the communication between different generations of professionals, form industry and cross-industry expert communities.

The key topic of “**Forsage-2017**” will be **the development of future vision on the horizon of 2035** as the world has changed greatly and keeps changing, while the future world and place in the future world being the burning and important discussion issues at any level including people, companies, countries and the world.

“Forsage-2017” will become a true thinking factory bringing together lead Russian and foreign experts, researchers of the future with various ideas which provides for maximum variety in discussions of various future scenarios (futurologists, scientists, entrepreneurs, analysts, and sci-fi writers). Work with the future will be carried out by various ways such as creative, descriptive, statistic, scenario, and analytical methods including the use of computer technologies (big data arrays, predicative analytics). All the Forum participants will be divided into groups based on the chosen method of work to form their view on the future. The participants will discuss the transformation of human values, analyze possibilities and risks for the company and industry, professions and jobs, work out their strategies of success for people and companies. Formation of a group view on the future and understanding of possibilities for future leadership are the objectives of “Forsage-2017”.

The outcomes of “Forsage-2017” will be the basis for a special topical round of the scientific and research program for the corporate sector “**Industries 2035**” within the **XIX World Festival of Youth and Students** that will be held in Sochi on 14-22 October, 2017, and bring together about 20 000 delegates from all over the world.

“**Forsage-2017**” audience includes young employees of Russian and international companies, executive authorities, target students of companies, young educators of target / basic departments of higher education organizations, young scientists and entrepreneurs.
